What is a nurse-led Abiraterone clinic?

As your Consultant has prescribed you Abiraterone for your prostate cancer, you will attend a nurse-led Abiraterone clinic. The clinic is run by two senior nurses who specialise in prostate cancer. You will be given an appointment time of when you need to attend.

How does the clinic work?

- You will be allocated an appointment time to attend the Abiraterone clinic
- You will need to have a blood sample taken prior to this appointment so that your blood results can be reviewed at your clinic appointment
- You will be assessed by the nurse, this will include:
  - Your general health
  - Record your blood pressure and pulse
  - Inform you of your blood results
  - Review your medication
  - Discuss any problems or concerns you may have
- If there is any cause for concern the nurse will refer you to the appropriate health care professional

What to do if you experience problems in between your appointments?

If you experience any problems in between your appointments you should telephone 0151 334 1155 and ask to be put through to the Oncology Triage bleep holder.

Prostate Advanced Nurse Practitioner: Sarah Jones 0151 334 1155, ext 5932

Clinical Nurse Specialist for Urological Cancers: Tracy Thomas 0151 334 1155, ext 5897
